ONE ROOM.

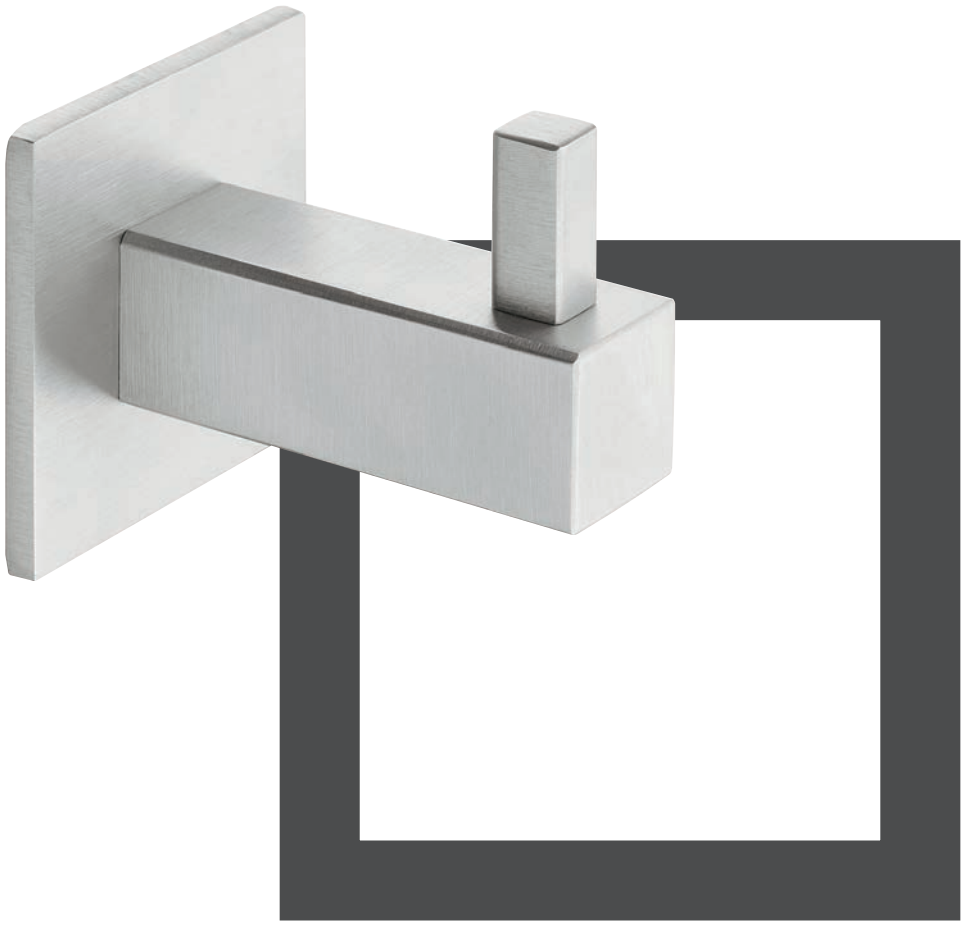
The Häfele hotel assortment makes it possible for design concepts to be consistently implemented down to the smallest detail.
Consistent designs and finishes. From the entrance door to the bathroom accessory. Adapted to the individual design concept. The hotel room is therefore presented as a stylistic unit in every respect, i.e. an atmospherically rounded whole. At the same time, the integrated Häfele hotel assortment provides more efficiency and transparency in the procurement process by means of delivery from a single source. And: Because the entire assortment is available worldwide, country and continent-encompassing hotel concepts can be implemented quickly and without problems at any time.

ONE PARTNER.

ONE STYLE.

Interior design in the hotel is not an end in itself, but an important marketing instrument. The signature of the designer enhances the brand profile, and is becoming increasingly important to guests when they are deciding where to stay. At the same time, operators and investors are subject to cost-effectiveness and functionality demands, and have to reconcile the design requirements with the financial framework conditions. Häfele is making it possible to fulfill both requirements to the same extent with the hotel assortment.

ONE FACE.



ONE LOOK.
ONE FORMAL LANGUAGE.

One system. Many options.

The Häfele hotel assortment is designed to integrate seamlessly into almost any design environment. The globally operating hotel specialists at Häfele have developed a design matrix based on international trends with which a wide range of different design concepts can be harmoniously rounded off. From modern to timeless. From standard to luxury.

The product range with the two classic basic shapes of round and square is available with four contemporary standard finishes in each case. This is the guarantee of formal continuity of a wide range of different concepts and designs. With minimal effort for the designer, the fabricator and the buyer.

ONE LOOK. ALL AREAS.

Unity in the variety.

The perception of a room is not oriented to product categories. It has a uniform and essentially subliminal effect. The Häfele hotel assortment therefore consists of a wide range of fitting solutions, but also functional furnishing accessories, all of which can be orchestrated into an overall room impression.

In all zones and areas. Rather than having a multitude of equipment details with differing origin, a coordinated range of products which enhances the harmonious impression of the room awaits the guest—and makes the procurement process much easier at the same time.

ENTRANCE DOOR.

From fitting to access control. Everything from a single source.

The many constituents of a hotel room door must be compatible, coordinated and often have to be ordered separately, even as far as the door viewer. Häfele will provide advice and support in selecting suitable elements with experience that has been gained on countless international projects, and will deliver all of the components of the Häfele hotel assortment ready for installation, worldwide. This also includes Dialock, the electronic access control system, as a main constituent. This is because it simplifies access control throughout the building for guests and other user groups, all the way to billing.

STORAGE SPACE.

Multi-functional inside. À la carte outside.

The reception area welcomes guests with a harmonious atmosphere which continues as they enter the room. Characterized by harmonically coordinated components, from handles to wardrobe hooks to the light. In accordance with the design concept.

Here the Häfele hotel assortment provides both options and hidden details such as hotel safes, coat hangers and integrated ironing boards. Or different connecting fittings for opening doors. Including a cost/benefit examination.

LIVING/SLEEPING.

Cozy atmosphere. With intelligent details.

You are not just designing the atmosphere in the room with Häfele LED lighting. You are creating a special experience for your guests by using intelligent functions. By using reading lights which do not disturb the person lying next to you, for example. And with which you can also charge your phone or tablet using the integrated USB socket. A sensor-controlled plinth light next to the bed provides orientation during the night by switching on automatically when it detects movement.

WORKING.

Matters concerning the table. Häfele has everything.

It is also useful in the “working” area if various individual components do not only come from a single source, but also fit in with the style of the room. Häfele provides coordinated solutions from screen brackets to socket elements with USB connections to drawer knobs on an international basis.

BATHROOM DOOR.

Glass, wood, sliding or hinged door. Optimally coordinated fitting solutions.

Access to a room can be designed in many different ways with Häfele. You can decide between hinged doors and sliding doors in accordance with the amount of space that is available. Depending on the required function, lightweight honeycomb materials, laminates, solid wood or glass is used. Häfele provides the right door fittings for all versions.

BATHROOM ACCESSORIES.

Consistent design. Standardized look.

Since a bathroom is often clinically functional, it soon becomes noticeable if the multitude of details from different manufacturers has failed to combine into a harmonious whole. This is why the Häfele hotel assortment provides an extremely comprehensive selection. So that the room does not only radiate harmony from the toothbrush holder to the shower door and the cosmetic tissue dispenser, but also makes a distinct impression.

SOUND SYSTEM

Light and sound are important design factors when it comes to generating an atmosphere in a room. “Moods” can be created in the room using ambient lighting, accent and functional lighting, light colors and brightness, and can be activated at the push of a button. At the entrance, next to the bed—wherever. The guest can stream the music from their phone to the integrated speakers and fall asleep or be woken up to their favorite tracks. In combination with room management for climate functions, operating costs are significantly reduced.

Häfele would be pleased to help you with the planning.

HANDLES.

Always the right handle. Functional and visual.

In addition to the possibility of making an impression in the room by means of consistent use of designs and finishes, functionality also plays a part in handle selection. Depending on the amount of available space and the handhold situation, flush pull handles can be used to increase the opening range of sliding doors, for example. Or pull handles if you want to make opening and closing easier by having as much gripping area as possible. Whatever you decide—you are sure to have the best Häfele quality.

CONNECTING FITTINGS.

Competence in furniture comes from Häfele.

“Without Häfele, furniture would be nothing more than a stack of boards.” Which is certainly the case. Modern furniture construction would be impossible to imagine without Häfele. As the world’s biggest hardware specialist, Häfele provides you with a comprehensive selection of products for furniture construction and for designing projects. In addition to the Häfele hotel assortment, you can fall back on a multitude of local fitting solutions which are adapted to regional requirements.

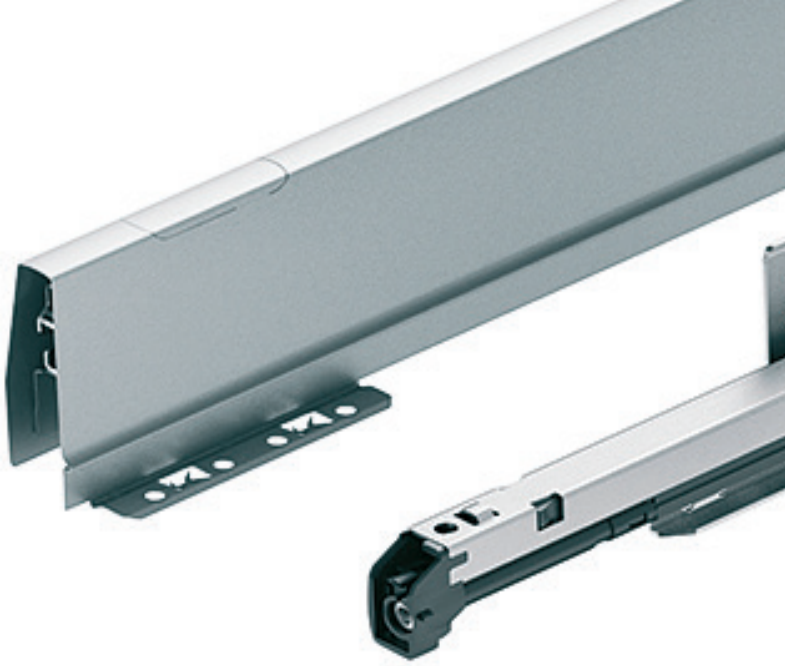
With Häfele, you have the right partner for providing all of the necessary fittings for you and your project. Manufacturer-independent, with a huge selection of different versions and outstanding availability of all components. There are also own house assortments for tasks such as sliding, connecting, opening and closing and systems for drawers, offices and LED lighting. Your specialist adviser can tell you more about areas in which Häfele can support you. For greater efficiency in procurement and more cost-effectiveness.

Flap systems

The Free flap fitting product range provides the right fitting for any kind of flap movement. Example: Free Flap for shallow cabinets with little room above them.

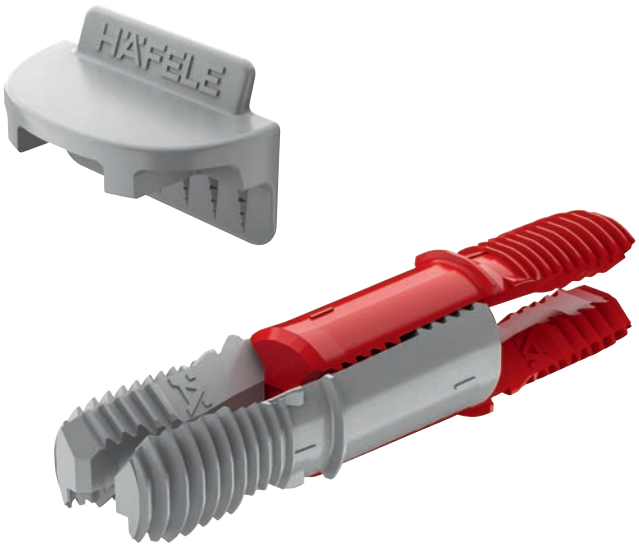
Hinge systems

The Lift+Turn product range consists of hinge solutions for any conceivable way of opening a cabinet door and providing soft closing if necessary. Example: Salice concealed hinge, for full overlay mounting and cup fixing without tools.



Pull-out systems

The MX drawer system meets challenges involving drawers and pull outs with well thought-out modularity. Example: MX runners with full extension and suitable drawer sides.



Connector systems

The Ixconnect product range provides application-optimized solutions for assembling furniture. Example: SC 8/25 spreading connector with suitable rear panel connector. Installed without tools and invisibly. Ideal for small furniture items.

360° COMPREHENSIVE HOTEL SOLUTIONS.

Many tasks. One partner. Häfele.

ONE PARTNER.

ONE STYLE.

Häfele looks after customers from the project area with its own team of specialists. You can fall back on the practical experience of our experts from planning to tendering and operation in order to safeguard your investment in the best possible way. Manufacturer-independent consulting and optimized logistics increase your cost-effectiveness in the material supply area. Your contact partner from Häfele is there for you to provide assistance in finding a solution to your challenges.

SMARTPHONE KEY.

That's how hotels work today: Simply open the door with your smartphone.

Häfele is providing you with trendsetting technology with Dialock. Instead of handing a room key to your guests only when they arrive at the hotel, the smartphone key makes arrival much more convenient. The guest receives access to the hotel and his room via an app. No more queues when checking in and out. The guests satisfaction increases. And you also relieve the strain on your staff at reception.

Smartphone key: Convincingly easy.

Your guests receive the key code on their app before arrival. That way the smartphone becomes the room key. Häfele establishes secure communication between the digital room key and the Dialock electronic access control system using the latest Bluetooth® technology. The door opens.

Additional services: Perfect for you and your guests.

Book a room via the app any time anywhere, check in easily, pay and check out again without having to go to reception. Häfele's cooperation partners make it possible. They integrate other customized functions into the app, such as sales-promoting offers from your hotel or individual tips for the destination of the trip.

Different generations of hotel room keys. Key / transponder / smartphone.

ADVANTAGES

- More convenience when arriving at the hotel: The guest receives his key code on his smartphone via app.
- The smartphone functions as a room key and simply communicates with the Dialock electronic access control system to open the hotel room door.
- High degree of security when opening the door thanks to the latest Bluetooth® technology.
- Book your hotel room via the app.

Planning by Dialock specialist is required. DT 750 door terminal modules on fire rated doors must be installed by a qualified technician after approval by the door manufacturer. If the terminal is installed without this permission, the Fire and Smoke Control Certificate for the door will be invalidated. Use only in combination with the ANSI mortise lock for DT 750. The function is determined with the mortise lock.

The DT 750 door terminal set must always be equipped with a mortise cylinder for mechanical emergency opening and to meet UL Fire Code Certifications. The batteries in the door interior trim module are secured with a special screw in the cover. This is meant to avoid unauthorized removal of the batteries. To insert the batteries into the internal module, a special bit is required. Please order separately.

Note
Mortise cylinder and batteries are sold separately.

LIVING/SLEEPING.

Cozy atmosphere. With intelligent details.

You are not just designing the atmosphere in the room with Häfele LED lighting. You are creating a special experience for your guests by using intelligent functions. By using reading lights which do not disturb the person lying next to you, for example. And with which you can also charge your phone or tablet using the integrated USB socket. A sensor-controlled plinth light next to the bed provides orientation during the night by switching on automatically when it detects movement.
